DETAILED ACTION

Allowable Subject Matter

1. Claims 7-11,16-20,40-49 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art shows a micromotor comprising an ultrasonically vibrating element; and a drive circuit having an oscillating voltage source connected to a switching arrangement which is connected to each electrode located on the vibrating element.

Prior art fails to show a discrete switch arrangement attached to at least one additional electrode of the ultrasonically vibrating element to which the oscillating voltage is not connected, wherein the switch arrangement selects the direction of the displacement.

Prior art also fails to disclose a first Mosfet connected between a first voltage, a first group of electrodes, a second Mosfet connected between the first voltage and the second group of electrodes, the common electrode being connected to a second voltage, and a control that selectively operates the Mosfet switches to selectively apply the first voltage to the first electrode group or to the second electrode group.

Prior art fails to show the method of supplying a switchable AC power to a micro-motor having the drain of a Mosfet transistor connected to a second terminal of the AC power source', connecting a source of the Mosfet transistor to the other side of the micromotor and selectively supplying power to the load by applying a voltage between a gate of the Mosfet and the second AC terminal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
